## Background & Introduction to Product

# Student Pain Point Solved

- Difficulty focusing in class while taking notes.
- Incomplete, messy, and fragmented notes (handwritten + screenshots + recordings).
- Wasted hours reorganizing lecture material before exams.
- Need for a more reliable and efficient study workflow.

## Background & Introduction to Product

# Core Differentiator

- Unlike generic transcription tools (Otter, Notta), WhisperNotes uses academic intelligence to:
- Identify key topics, examples, exam cues.
- Produce exam-ready, organized notes rather than plain transcripts.

## Background & Introduction to Product

### What WhisperNotes Is?

- An AI-powered note-taking and learning assistant for university students.
- Records lectures, syncs audio with slides, and generates structured summaries, flashcards, and quizzes.

**Student Pain  
Point Solved**

**Core  
Differentiator**

**Value  
Proposition**

# Value Proposition

- Reduces cognitive load during lectures.
- Automatically converts raw lecture content into usable study materials.
- Helps students prepare better and faster for exams and assignments.
- Offers privacy-friendly processing (local/offline).

# EVC Calculation

| Component                        | Calculation Logic                                                                                                                                                                  | Value / user / month |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| Reference Value (Otter Pro)      | Baseline equivalent subscription price                                                                                                                                             | \$8.50               |
| AI Exam-Oriented Study Notes (+) | WhisperNotes converts lecture transcripts into exam-focused notes (key points, definitions, formulas). Saves ~6 hours/month of manual re-writing & organizing. (6 hrs × \$12.5/hr) | +\$75                |
| Flashcard Automation (+)         | Automates creation of 5–10 flashcards per lecture. Saves ~3 hours/month (3 hrs × \$12.5)                                                                                           | +\$37.5              |
| Personalized Quiz Generation (+) | Reduces exam prep time by generating tailored quizzes. Saves ~4 hours/month. (4 hrs × \$12.5)                                                                                      | +\$50                |
| Reduced Revision Time (+)        | WhisperNotes organizes content by concepts, topics, and definitions. Saves ~2 hours/month. (2 hrs × \$12.5)                                                                        | +\$25                |
| Replaces Multiple Study Apps (+) | Avoided monthly cost of Quizlet (\$8), Notion AI pages (\$5), audio note apps (\$3).                                                                                               | +\$16                |
| Minor AI Cleanup Cost (–)        | Occasional need to correct small summary/transcription errors. (–2 hrs × \$12.5)                                                                                                   | –\$25                |
| Total                            | \$187.00                                                                                                                                                                           |                      |

# Conjoint Analysis - Survey Process

# Survey Design

- Survey + Choice-Based Conjoint (CBC) conducted with 43 university students.
- Explored current note-taking habits, tool usage, adoption likelihood, and feature trade-offs.
- Our survey focused on 4 major attributes:
  - Summary Quality
  - Slide Synchronization
  - Monthly Price
  - Sample Quiz Generation

Have you used a digital note-taking or transcription app (e.g., Otter.ai, Notion, Notta)?

How likely are you to try an AI-powered note-taking app like this?

# Conjoint Analysis - Survey Process

# Conjoint Analysis

# Conjoint Analysis - Survey Process

# Conjoint Analysis

The change in total utility between “Free” and \$14.99 was approximately 219 (95.72 + 123.28) utils. Applying the class formula:

1 util =  $14.99\text{USD} / 219 \text{ utils} \approx \text{\$0.0684 per util}$

- Summary Quality (No Summary vs Summary + Flashcards): +60.49 utils → \$4.14 of perceived value
- Slide Synchronization (Present vs Absent): +38.31 utils → \$2.62 of perceived value
- Sample Quiz Generation (Present vs Absent): +33.82 utils → \$2.31 of perceived value

# Recommendations

- The Free Plan will include limited recording and summarization for trial use, encouraging adoption and word-of-mouth growth.
- The Pro Plan at approximately \$4.99 per month will unlock high-quality summaries with full access to contextual flashcards, quizzes, and offline features.

**Feature Roadmap**

**Platform evolution**

**Experimentation  
& Metrics**

# Feature roadmap

- 1 Prioritize Summary Quality.
- 2 Next, build and refine quiz generation.
- 3 Then enhance slide synchronization.

# Recommendations

- The Free Plan will include limited recording and summarization for trial use, encouraging adoption and word-of-mouth growth.
- The Pro Plan at approximately \$4.99 per month will unlock high-quality summaries with full access to contextual flashcards, quizzes, and offline features.

**Feature Roadmap**

**Platform evolution**

**Experimentation  
& Metrics**

# Platform Evolution

Long term, evolve into a platform linking students and educators via shared templates and curated study packs.

Leverage cross-side network effects and data-driven personalization.

Use recommender systems to suggest flashcards and quizzes based on past performance.

# Recommendations

- The Free Plan will include limited recording and summarization for trial use, encouraging adoption and word-of-mouth growth.
- The Pro Plan at approximately \$4.99 per month will unlock high-quality summaries with full access to contextual flashcards, quizzes, and offline features.

**Feature Roadmap**

**Platform evolution**

**Experimentation  
& Metrics**

# Experimentation & Metrics

Use A/B testing for pricing, onboarding, and feature adoption.

**Goal metric:** semester-to-semester retention of paying users.

**Driver metrics:** lecture-to-note conversion, quiz completion, weekly active users.

**Guardrail metrics:** user trust, privacy satisfaction, and summary accuracy.
